

AVENTURA AESTHETIC SURGICENTER AND MEDISPA

Headed by Board Certified Plastic Surgeon Andrew P. Amunategui, MD, Aventura Aesthetic SurgiCenter and MediSpa offers a tiered treatment approach that is uniquely tailored to each patient's individual needs.

THE MOST PROMISING DEVELOPMENTS

As one of Florida's leading Plastic Surgeons, Dr. Andrew Amunategui has developed a tier of protocols to address the early and more advanced stages of aging, facial and body imperfections, and facial and body enhancement. With a keen eye for the most promising developments in cosmetic medicine, Dr. Amunategui has assembled a brilliant array of options for correcting the effects of time, environmental damage, and even genetics.

Non-invasive cosmetic treatments are often selected as the first tier of intervention for their ability to provide remarkable results with little or no downtime. When appropriate, laser technologies and surgical procedures may be introduced to maximize a patient's treatment benefits.

Whether a tier one, two, or three protocol is indicated, Dr. Amunategui utilizes the most advanced and refined methods to slow and reverse the aging process, restore youthful contours and skin health, and improve the appearance of the face and body. These methods offer better results than were possible in the past and have redefined our concept of aging and the elusive, exclusive ideal of beauty.

A plastic surgeon committed to elevating the field of aesthetics, Dr. Amunategui offers an unprecedented level of care in an environment that is elegant, unhurried, and attentive to each patient's individual needs and desired results.

ABOUT US

ANDREW P. AMUNATEGUI, MD

A recipient of numerous honors throughout his distinguished academic career, Dr. Amunategui graduated from the prestigious premedical program at The Johns Hopkins University and took one of the internationally coveted spots studying medicine at the University of Miami School of Medicine. Dr. Amunategui then proved his commitment to the surgical field by completing the rigorous five year General Surgical Residency at Wayne State University. There he practiced life saving surgical procedures at the five affiliated hospitals of the Detroit Medical Center. He was awarded a Plastic Surgery Fellowship under the guidance of Indiana University and Purdue University's top-notch faculty and studied the delicate techniques of plastic surgery, including microsurgery.

Dr. Amunategui's superior credentials won him the honor of a Cosmetic Surgery Fellowship with the internationally respected team of Doctors Baker and Stuzin in Miami. Their years of groundbreaking research have helped to positively reshape the field of cosmetic surgery. Board Certified by both the American Board of Plastic Surgery and the American Board of Surgery, Dr. Amunategui's combination of extensive training and surgical practice qualify him to provide true expertise in the field of plastic surgery.

As a diplomat of the American Board of Plastic Surgery and a member of the American Society of Plastic Surgeons, Dr. Amunategui enjoys membership in the nation's leading professional organization for plastic surgeons.

Andrew P. Amunategui, MD
AVENTURA AESTHETIC SURGICENTER AND MEDI SPA

Dr. Amunategui's tiered intervention is designed to address the early signs of aging, facial and body imperfections, and facial and body enhancement with less invasive techniques. More aggressive treatment options are introduced only when they are necessary and when the benefits can be maximized.

Tier 1 BOTOX® Cosmetic, Dysport®, Xeomin®

ERASING LINES AND WRINKLES

Neuromodulators are among the most popular and effective anti-aging treatments available today. These FDA approved therapies work by relaxing and weakening contracted muscles to smooth away lines and wrinkles. With Dr. Amunategui's artistic touch, they can also be used to gently lift a sagging brow and to create a more ideal eyebrow arch.

Areas: wrinkles around eyes and on forehead, dimples on chin, lines on nose, bands on neck, and lines on lips

Tier 1 COSMETIC FILLERS

PROMOTING YOUTHFUL CONTOURS

Since facial fat dissipates and migrates as we age, replacing it is one of the most effective treatments we can choose to slow and reverse the effects of time. New bio-compatible injectable fillers are available in a variety of thicknesses and formulations offering tremendous versatility for restoring youthful volume and contouring the face.

Areas: hollows around eyes, cheeks, lips, laugh lines, marionette lines, chin, jawline, facial scars, and hands

Tier 2 LASER AND LIGHT BASED THERAPIES

STATE OF THE ART SKIN RESURFACING

Our state-of-the-art lasers and light based technologies represent the best advancements in skin tightening, skin resurfacing, laser lifting, and photo correction.

Designed to transform the look and feel of the skin, these therapies can be used to target specific concerns such as skin slackening, excess fat, wrinkles, textural irregularities, stretch marks, acne scarring, sun related skin damage, and skin discolorations.

Areas: face, neck, chest, abdomen, thighs, and hands

Tier 1 NEOGRAFT FOLLICULAR UNIT EXTRACTION

HAIR RESTORATION

The NeoGraft implantation hair system is a highly innovative, SCARLESS treatment for hair loss. With FUE (follicular unit extraction) hair grafts from the head are harvested individually and then placed in the thinning or balding areas. FUE offers several unique advantages, including minimal discomfort, no scalpel incision, no sutures, no linear scar, little to no risk of complications, quick recovery time, and a more natural looking result.

Areas: wherever thinning hair and bald spots exist

Tier 2 FAT TRANSFER

SEMI-PERMANENT VOLUME ENHANCEMENT

Working in a similar fashion to cosmetic facial fillers, autologous fat transfer can be used to "fill" deep lines and wrinkles, smooth facial scars, restore facial volume and augment the cheeks, chin, breasts, and buttocks.

A special liposuction technique is used to harvest fat from areas of the body where an excess exists. The fat is then injected into the face using a micro-injection technique. Results can last up to several years or longer.

Areas: eyes, temples, cheeks, chin, jawline, deep facial wrinkles and scars, breast, buttocks, and hands

Tier 2 Liposuction

REVEALING SHAPLIER CONTOURS

Under the broad, popular classification of liposuction are several techniques that Dr. Amunategui can use to remove excess and stubborn areas of fat from the body. Precision, skill, and artistry result in shaplier, smoother, better defined contours.

Areas: neck, arms, chest, abdomen, waist, love handles, buttocks, thighs, and knees

Tier 3 A BALANCED BLEND OF SCIENCE AND ARTISTRY

WHEN SURGERY IS THE METHOD OF CHOICE

Specific aspects of aging such as loose, sagging skin and undesired fat accumulations in the face, eyes, chin, and neck are best addressed with aesthetic plastic surgery. Nose reshaping, breast augmentation, breast reduction, tummy tuck, and body contouring are also areas where surgery offers the most desired results.
